

Enable to handle Mega-Vessels

PACECO® - MITSUI
Large-size PORTAINER®

Features :

- More than 60m outreach and 40m lift enabling to handle Mega-vessels^{*1}
- Mitsui-Paceco 65ton Twin-20ft Spreader is available
- Durable and easy maintenance design based on 40 years experience
- Light weight and high rigidity steel structural portal frame
- Work Instruction by Vessel Plan computer system (option)

^{*1}; Depend on the quay dimensions

The PORTAINER® eases the maintenance by gathering of main components and using unitized machineries. (i.e. trolley, girder end)

The large-size PORTAINER® is designed for light-weight and high rigidity by optimum arrangement of structural reinforcement as well as mono boom/girder design. A 62m outreached PORTAINER® weighs approx. 1,100 ton dead weight.

The large-size PORTAINER® provides high productivity handling by the following features, against the worst operational circumstance due to higher lift and higher speed crane.

- ◇ Good visibility through the wide glasses
- ◇ Good response by AC control drive
- ◇ High rigidity portal frame

In case of adopting the Vessel Plan computer system, work instruction is displayed on the Mobile Data Terminal in Operator's cab. (option)

Mobile Data Terminal
