

NZE Transtainer

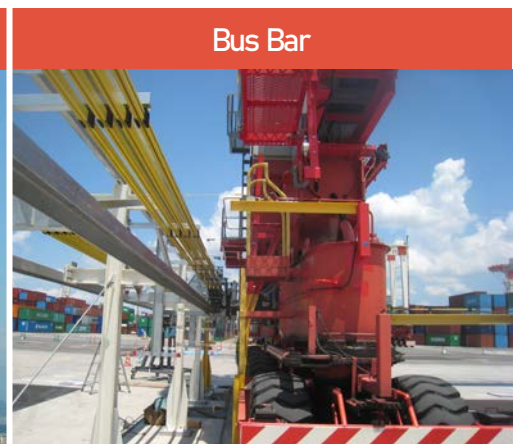

The NZE (Near Zero Emissions) Transtainer is an updated version of the well-established PACECO-Mitsui hybrid Transtainer crane, featuring a power module combination of larger capacity lithium-ion batteries directly providing power to the crane and a small engine used to recharge the batteries.

Zero Emission Electrified Transtainer Cranes

PACECO-Mitsui has solutions to make your terminal operations sustainable now and into the future.

On-Board Cable Reel

Bus Bar

Supply Voltage	460V / 6.6kV	460V
Cable connection work	Manual connector	Manual connector
Power supply distance	Approx ± 200~350m	Approx 300m
Civil works	Cable trench, transformer	Collector pole, transformer
